- ☐ Know how Britain has had a major influence on the world

Exciting Books

How did Oldham help to change the World?

What was the Industrial Revolution?

The word '**revolution**' means a process of change. The **Industrial Revolution** was a time in British history where the country changed hugely from a mostly **rural** society to an **industrial** one. This means that many British people moved from living in small towns and villages, where they were farmers, to huge cities, where they worked in places such as factories or mills. It also meant society changed from being based on manufacturing by hand and human or animal power, to a society based on machinery.
